(54) Title: METHOD OF STORING AND REPRODUCING CONTENTS

(57) Abstract: A method of storing and reproducing contents in
a terminal capable of storing and outputting contents such as pic-
tures or music is provided. When the terminal connects to a con-
tents server and downloads contents from the contents server, it
stores the downloaded contents along with its terminal identifica-
tion information. When reproducing stored contents, the termi-
nal compares terminal identification information attached to the
contents with its terminal identification. If they are identical, the
terminal reproduces the contents.
